

PRESS RELEASE
June 2011

TTC APPOINTED NATIONAL DISTRIBUTOR FOR DELCO
REMY HEAVY DUTY ROTATING ELECTRICS

TTC, part of the Unipart Group, is delighted to announce that it is now the national distributor for Remy Automotive's range of starters and alternators for commercial vehicles. This is yet another exciting addition to TTC's ever expanding parts product portfolio and partnerships with industry leading brands.

TTC is the UK's leading aftermarket supplier for commercial vehicle components, covering truck, trailer, LCV and specialist applications. TTC maintains high levels of service and availability coupled to an excellent choice of product brands offering exceptional levels of quality. This ensures TTC remains the natural choice supplier for replacement parts in the commercial vehicle aftermarket.

Remy, the world's No. 1 in starters and alternators, with more than 100 years of experience, is one of the leading suppliers of high quality new and remanufactured parts in Europe.

Michael Flensburg, UK sales & marketing director of Remy Automotive commented: "We are delighted to have TTC on board to stock our full range of Heavy Duty starters and alternators. It is particularly pleasing to have been selected, as TTC had not previously been stockists of rotating electrics products. TTC has made a major investment of over £100,000 to ensure that they are fully equipped to meet market demand. Over 1,000 alternators and starters will be stocked at TTC Crewe, consisting of 450 part numbers. This stock holding covers 95%+ of their market.

"The agreement with TTC enables us to now offer greatly increased national visibility and availability of the Delco Remy OE and Aftermarket HD product to the entire UK marketplace. TTC will play a vital role in the success of our HD programme and has been chosen because of its strength as a well recognised national distributor of CV parts."

Darren Miller, head of marketing at TTC added: "This brand new product proposition is a very exciting addition to our already wide commercial vehicle product range.

"TTC will be stocking a wide range of Remy starters and alternators to cover the UK CV and LCV aftermarket, totaling over 450 part numbers in Crewe, for same day and next day delivery."

Delco Remy is a global OE and OES rotating electrics manufacturer and is No1 in the world in rotating electrics. All units are built to OE standard as a minimum and re-engineered to improve on OE design where necessary. We also offer a 24-month or 60,000 mile no quibble warranty.

For further details on the Remy range please visit [TTC Online](#).
